Projects

Matrimony
Enhanced a user-friendly matrimonial platform by incorporating advanced features and bolstering security measures. Introduced star matching and city-based distance calculations seamlessly, eliminating the need for external APIs. Integrated diverse payment and SMS gateways for enhanced convenience. Furthermore, developed an intuitive API to seamlessly connect and interact with the application.

E-commerce
Enhanced an e-commerce platform with robust features and elevated security measures. Employed a variety of payment and SMS gateways to broaden the user experience. Moreover, implemented a user-friendly API to facilitate seamless interaction with the application.

Real estate
Designed and developed an user-friendly real estate web application facilitating both property rental and sales. Administrators can effortlessly add agents and assign properties to them, while users enjoy the convenience of adding and selling their properties based on their selected packages. The platform ensures a comfortable and efficient experience for property sales and rentals.

GYM

Created a sophisticated web application for a fitness platform, empowering administrators to set schedule dates for each trainer. Users have the flexibility to book any trainer, specifying their preferred training time. The training options encompass both offline and online.

Victoria realtors

Victoria Realtors successfully undertook the development of a sophisticated web application to manage project accounts and details, utilizing CodeIgniter. Additionally, intricate functionalities were implemented through triggers in PHPMyAdmin. The project also involved the creation of an intuitive API, ensuring seamless connectivity and interaction with the application.

Static to dynamic sites

Engineered a dynamic web application utilizing Core PHP, focusing on robust design and seamless development to enhance user interactivity and overall performance.

Education

B.Tech - Information Technology (IT)   2016 – 2020
Institution: Sri subramanya college of engineering and technology
Year of Graduation: 2016-2020
